

## Discussion Questions

How well are we performing with respect to the following leading governance practices:

- Setting the vision
- Establishing goals
- Developing policy
- Allocating resources
- Assuring accountability?

As a Board, are we inclusive and welcoming to diverse points of view?  
If not, how can we improve?

How could we be more accountable to the community?  
How could we be more responsive to our constituents?

How could we be more consistently focussed on our goals?

How could we handle internal conflicts more effectively?

How could we improve the day-to-day workings of the Board?

As an organization, how can we improve our ability to be innovative?
